

MERN Stack Development Course

XpertsEdgeTechnologies · Anna Nagar

Become a Job-Ready MERN Stack Developer in 3 Months

Learn **MongoDB** · **Express.js** · **React.js** · **Node.js** through real-time projects, interview prep, and a GitHub portfolio you'll be proud to show.

Enroll Now — 8870783300

COURSE OVERVIEW

Built for the Modern Full Stack Developer

This course is designed for **students, freshers, career switchers, and working professionals** who want to build production-grade full stack web applications from scratch — with real code, real projects, and real confidence.

Frontend

Build dynamic, responsive UIs with React.js, forms, routing, and API integration.

Backend

Design and deploy RESTful APIs with Node.js, Express.js, and middleware.

Database

Manage data with MongoDB, Mongoose schemas, and CRUD operations.

Career Ready

Resume support, mock interviews, GitHub portfolio, and placement preparation.

Complete Full Stack Web Development — MongoDB · Express.js · React.js · Node.js, all in one intensive 3-month program.

WHY CHOOSE US & WHO CAN JOIN

The Right Course for the Right Learner

Why Choose This Course

- Beginner-friendly, structured curriculum
- Real-time, project-based learning
- Hands-on coding from Day 1
- Frontend & backend integration covered
- Resume support & mock interview prep
- GitHub portfolio guidance included
- Placement-oriented preparation

Who Can Join

Students & Freshers

BCA, B.Sc, B.Tech, MCA graduates starting their tech career.

Career Switchers

Professionals pivoting into full stack web development.

Working Professionals

Anyone looking to upskill and stay relevant in today's tech market.

The Full MERN Technology Stack

Master every layer of modern web development — from pixel-perfect interfaces to scalable server APIs and cloud-hosted databases.

Frontend

HTML5 · CSS3 · Bootstrap · Tailwind CSS · JavaScript · React.js ·
React Router · Forms · API Integration

Backend

Node.js · Express.js · REST APIs · Middleware · Controllers ·
Authentication · JWT Basics · Validation

Database

MongoDB · MongoDB Atlas · Mongoose · CRUD Operations ·
Schema Models · Data Validation

Dev Tools

VS Code · Postman · Git · GitHub · npm · MongoDB Compass ·
Chrome DevTools · Deployment Basics

6 Modules. One Complete Skill Set.

Each module builds on the last — from web fundamentals to fully integrated full stack applications ready for deployment.

Module 1

Web Dev Basics

HTML, CSS, responsive layouts, forms, tables, navbar, cards, landing page design.

Module 2

JavaScript Fundamentals

Variables, functions, arrays, objects, DOM, events, ES6, async JavaScript.

Module 3

React.js Frontend

Components, props, state, hooks, React Router, forms, validation, reusable UI.

Module 4

Node.js & Express.js

Server setup, routing, middleware, controllers, request/response, REST APIs.

Module 5

MongoDB & Mongoose

Collections, CRUD, schemas, models, database connection, validation.

Module 6

Full Stack Integration

React + Express API integration, auth flow, Postman testing, GitHub, deployment.

Your 3-Month MERN Stack Success Roadmap

A structured, milestone-driven journey — from absolute beginner to confident, job-ready full stack developer.

Month 1 — Foundation

HTML · CSS · Bootstrap · JavaScript basics ·
Responsive layouts · DOM & Events

Month 2 — Development

React.js · Node.js · Express.js · MongoDB ·
REST APIs · CRUD · Mongoose

Month 3 — Project + Career

Full stack projects · GitHub portfolio · JWT
auth · Mock interviews · Resume prep

Final Outcome

Beginner → Job-Ready MERN Stack Developer with a real portfolio, interview confidence, and full stack skills employers demand.

MONTH 1

Foundation Month — Build Strong Fundamentals

Focus: Establish a rock-solid base in web development and JavaScript programming before advancing to React and backend work.

Topics Covered

- Full Stack & MERN Stack overview
- HTML5 · CSS3 · Bootstrap / Tailwind CSS
- Responsive layout building
- Forms, tables, navbar, and cards
- JavaScript: variables, data types, operators
- Conditionals, loops, functions, arrays
- Objects, DOM basics, events, ES6

Month 1 Outcome

Students can build fully responsive webpages, understand core JavaScript programming concepts, and are fully prepared to begin React.js and backend development in Month 2.

MONTH 2

Development Month — Build Frontend & Backend Apps

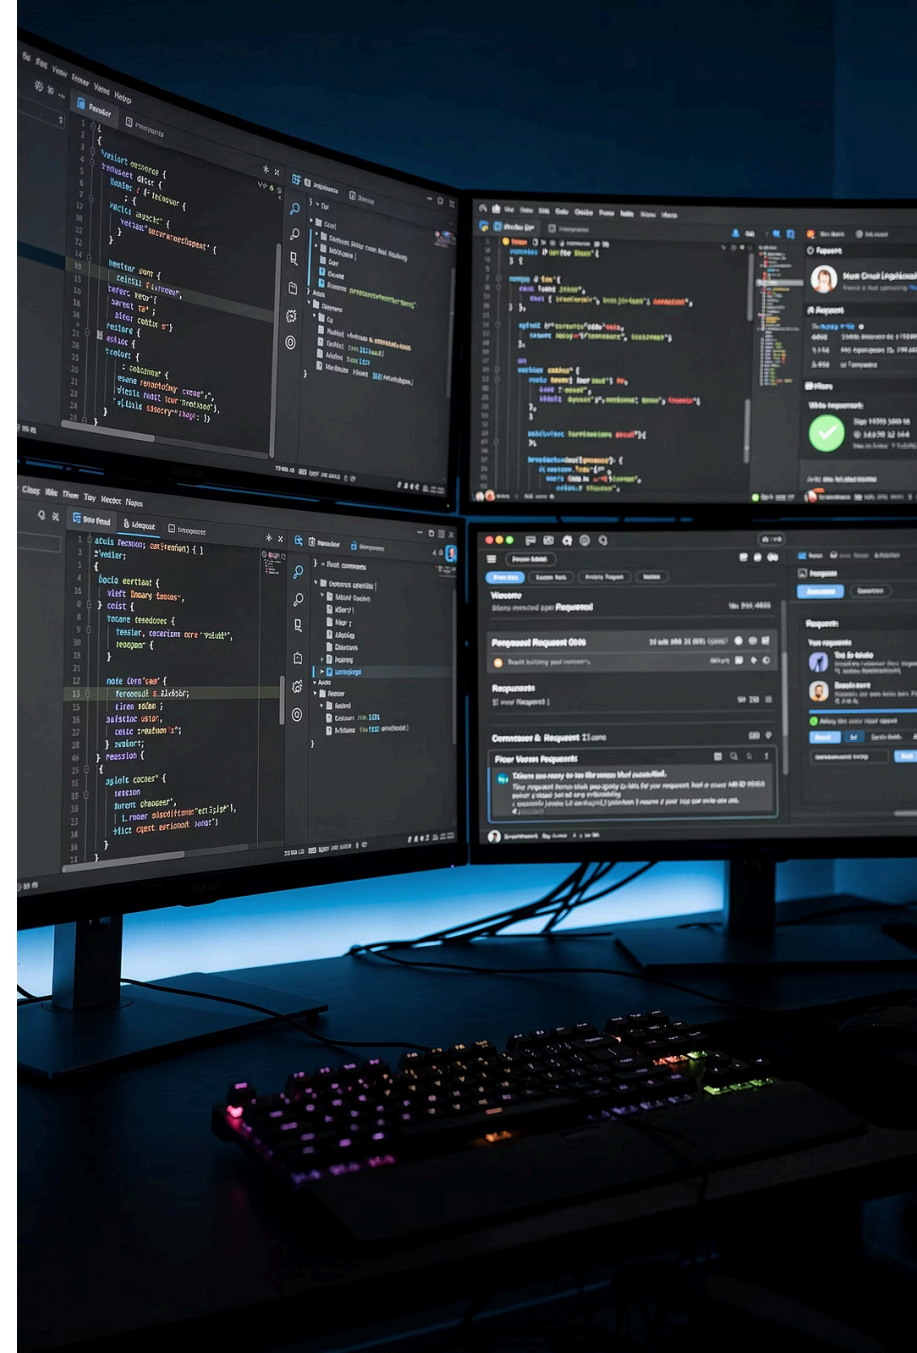

Focus: Develop dynamic React frontends, build RESTful backend APIs with Node.js and Express.js, and connect MongoDB databases.

Topics Covered

- Advanced JavaScript & async concepts
- React.js: components, props, state, hooks
- React Router, forms, validation, API calls
- Node.js & Express: server setup, routing
- Middleware, controllers, REST API design
- MongoDB: CRUD operations, Mongoose schemas

Month 2 Outcome

Students can build complete React screens, create and test backend REST APIs, perform database operations with MongoDB, and fully understand the end-to-end full stack application flow.

MONTH 3

Project + Career Month — Become Job-Ready

Focus: Apply all skills to real-time projects, build a GitHub portfolio, and prepare thoroughly for developer job interviews.

Topics Covered

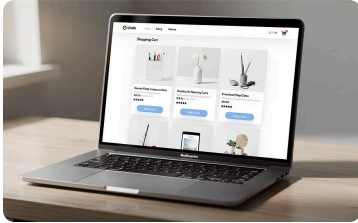

- React + Express full stack integration
- JWT authentication · Login & registration flow
- Role-based access · Error handling
- Postman API testing · Git & GitHub workflows
- Deployment basics
- Resume preparation · Mock interviews
- Project explanation & portfolio guidance

Month 3 Outcome

Students complete real-time full stack projects, deploy a professional GitHub portfolio, and enter job interviews with practical experience, strong fundamentals, and genuine confidence.

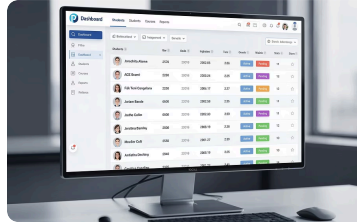

Real Projects. Real Skills. Real Career.

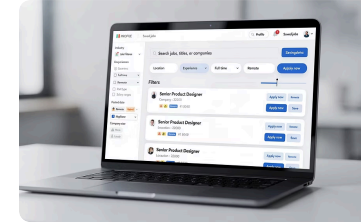

E-Commerce Web App

Product listing, cart, order flow, admin panel, login system, MongoDB database, and REST API integration.

Student Management System

Registration, course management, attendance tracking, admin dashboard, and full MongoDB CRUD integration.

Task Manager / Job Portal

User roles, dashboard, search & filters, authentication flow, REST API communication, and database handling.
