Who We Are

XpertsEdgeTechnologies

XpertsEdgeTechnologies is a Chennai-based IT training institute dedicated to transforming aspiring developers into industry-ready professionals. We specialize in practical, project-based training that bridges the gap between academic knowledge and real-world software development.

Our programs are designed by experienced software engineers and industry practitioners who understand exactly what employers look for. Every module, every project, and every session is crafted to make you job-ready — not just certificate-ready.

Job-Oriented Training

Every session is mapped to real industry requirements and interview expectations.

100% Hands-On

Learn by building. No passive lectures — only practical, project-driven sessions.

Chennai-Based, Globally Relevant

Located in Anna Nagar, Chennai. Skills taught are globally in demand.

Why Choose This Program?

Not all bootcamps are equal. Here's what makes XpertsEdgeTechnologies different.

Real-Time Projects

Work on live, industry-grade projects from Day 1. Build a portfolio that speaks louder than a resume.

Expert-Led Sessions

Learn from working software engineers with hands-on industry experience — not just theory.

Full Stack Coverage

From HTML to Spring Boot to React JS — master the complete modern Java full stack.

Interview-Ready Curriculum

Every topic is aligned with what top companies actually ask in technical interviews.

Placement Support

Resume building, mock interviews, LinkedIn optimization, and referral network access.

Convenient Location

Anna Nagar, Chennai — one of the city's most accessible tech training hubs.

Everything You Need to Know Master Java Full Stack Development with Real-Time Projects

3-4 Months

Program Duration

100% Practical

Training Approach

Career Focus

Course Name:

Master Java Full Stack
Development with Real-Time
Projects

Duration:

3-4 Months

Training Mode:

Offline / Hybrid (Anna Nagar,
Chennai)

Batch Type:

Weekday & Weekend Batches
Available

Eligibility:

Any graduate, fresher, or working
professional

Core Technologies:

Java, Spring Boot, React JS, MySQL,
REST APIs

Projects:

Real-Time Industry Projects

Certification:

Course Completion Certificate

Placement Support:

Resume, Mock Interviews,
Referrals

Contact:

8925175332 / 8870783300

Your Full Stack Journey

A structured, progressive roadmap from zero to full-stack developer — in 3 to 4 months.

1

Month 1: Foundations

HTML, CSS, JavaScript, Bootstrap/Tailwind, Core Java

2

Month 2: Frontend

React JS, Component Architecture, State Management, API Integration

3

Month 3: Backend

Advanced Java, JDBC, MySQL, Spring Framework, Spring Boot, REST APIs

4

Month 4: Full Stack + Projects

React + Spring Boot Integration, Real-Time Projects, Portfolio, Interview Prep

Each phase builds on the last — ensuring you develop deep, connected knowledge rather than isolated skills. By the end, you'll be capable of building and deploying complete web applications independently.

XpertsEdgeTechnologies · 8925175332 / 8870783300

Build the Bedrock of Web Development

HTML · CSS · JavaScript · Core Java

Month 1 lays the essential groundwork. You'll go from understanding how web pages are structured to writing dynamic, interactive front-end code — and simultaneously begin your Java programming journey.

Web Fundamentals

- HTML5: Semantic tags, forms, tables, media elements
- CSS3: Flexbox, Grid, animations, responsive design
- JavaScript: Variables, functions, DOM manipulation, events, ES6+ features
- Bootstrap / Tailwind CSS: Rapid UI development with utility-first frameworks

Core Java

- Java Basics: Data types, operators, control flow
- OOP Concepts: Classes, objects, inheritance, polymorphism, encapsulation, abstraction
- Exception Handling: Try-catch, custom exceptions
- Collections Framework: ArrayList, HashMap, LinkedList
- String Handling & File I/O

Java-CSS

```
HTML:
{onorn:('Bs"shavara") {
  vegineīve"))
  natl:(R")
  v snoper("3eSerwart fs");
  v eAnuit("Desg");
  tnobage(l
  edown{ "scucodtsrāt);
  SuicSeve Eīec)
  v saton: "Davīē/Tande)(Junfa
  vablanU:/o8";
}
```

Build Beautiful, Responsive UIs

Bootstrap · Tailwind CSS · React JS

Modern front-end development demands more than just HTML and CSS. In this phase, you'll master utility-first styling frameworks and the world's most popular JavaScript UI library — React JS.

Styling Frameworks

Bootstrap:

- Grid system, responsive breakpoints
- Pre-built components: Navbar, Cards, Modals, Forms
- Utility classes and customization

Tailwind CSS:

- Utility-first approach
- Custom design systems
- Responsive and dark mode support
- JIT (Just-In-Time) compilation

React JS:

- JSX syntax and component-based architecture
- Props, State, and Lifecycle methods
- React Hooks: useState, useEffect, useContext
- React Router for SPA navigation
- Axios for API calls
- Building reusable UI components
- State management fundamentals

Go Deep into Java & Databases

Advanced Java · JDBC · MySQL

With your front-end skills in place, Month 2 takes you into the engine room of enterprise software. You'll master advanced Java concepts, connect applications to databases, and write powerful SQL queries.

Advanced Java

- Multithreading & Concurrency
- Generics and Lambda Expressions
- Functional Interfaces & Streams API
- Java 8+ Features: Optional, Method References
- Design Patterns: Singleton, Factory, Builder
- Inner Classes & Anonymous Classes
- Serialization & Deserialization

JDBC & MySQL

JDBC:

- JDBC Architecture & Drivers
- Connection pooling
- PreparedStatement & CallableStatement
- Transaction management

MySQL:

- Database design & normalization
- DDL, DML, DCL commands
- Joins, Subqueries, Indexes
- Stored Procedures & Triggers
- MySQL Workbench

The Foundation of Enterprise Java

Spring Core · Spring MVC · Spring Data JPA

Spring is the backbone of modern Java enterprise development. This module gives you a thorough understanding of the Spring ecosystem — from dependency injection to building full MVC web applications.

Spring Core

- Inversion of Control (IoC) & Dependency Injection (DI)
- Bean lifecycle and scopes
- ApplicationContext & BeanFactory
- Annotations: @Component, @Autowired, @Bean, @Configuration
- Aspect-Oriented Programming (AOP)
- Spring Expression Language (SpEL)

Spring MVC & Data

Spring MVC:

- DispatcherServlet architecture
- Controllers, Views, and Model
- Form handling and validation
- Exception handling with @ControllerAdvice

Spring Data JPA:

- ORM with Hibernate
- Entity mapping and relationships
- JPQL and native queries
- Repository pattern: CrudRepository, JpaRepository

Build Production-Grade APIs

Spring Boot · REST API Development · Security

Spring Boot eliminates boilerplate and lets you build powerful, production-ready backend services in record time. Combined with REST API development, you'll be building the kind of backends that power real-world applications.

Spring Boot

- Auto-configuration and starter dependencies
- application.properties / YAML configuration
- Embedded Tomcat server
- Spring Boot DevTools for hot reload
- Actuator for monitoring
- Profiles for dev/test/prod environments
- Exception handling with @RestControllerAdvice
- Logging with SLF4J & Logback

REST API Development

- REST principles and HTTP methods (GET, POST, PUT, DELETE)
- @RestController, @RequestMapping, @PathVariable, @RequestBody
- Request/Response DTOs and JSON serialization
- API versioning strategies
- Pagination and sorting
- Spring Security: JWT Authentication & Authorization
- Swagger/OpenAPI documentation
- Postman for API testing

Connect Frontend to Backend

React JS + Spring Boot · End-to-End Development

This is where everything comes together. You'll build a complete, deployable full-stack web application — with a React JS frontend consuming a Spring Boot REST API backend, connected to a MySQL database.

1

React JS Frontend

User interface, routing, state management, API calls via Axios

2

REST API Layer

Spring Boot controllers, DTOs, service layer, security

3

Business Logic

Service classes, validation, error handling

User authentication system (Login/Register with JWT)

Role-based access control (Admin / User)

Dynamic dashboard with real-time data

CRUD operations with React forms

4

Data Layer

Spring Data JPA, Hibernate ORM, MySQL database

File upload and management

Search, filter, and pagination

Responsive UI with Tailwind/Bootstrap

Deployment on cloud (AWS/Heroku basics)

Build Projects That Get You Hired

Real-World Applications · Industry-Grade Complexity

Every project you build is designed to demonstrate a specific, employer-valued skill. These aren't toy apps — they're portfolio pieces that show recruiters you can build real software.

E-Commerce Platform

Full-stack shopping app with product catalog, cart, checkout, and order management. React + Spring Boot + MySQL.

Hospital Management System

Patient registration, appointment booking, doctor dashboard, and billing. Role-based access with JWT.

Online Learning Portal

Course management, video streaming, quiz engine, and student progress tracking.

Job Portal Application

Job listings, applicant tracking, employer dashboard, and resume upload.

Banking Application

Account management, fund transfers, transaction history, and statement generation.

Employee Management System

HR dashboard, attendance tracking, payroll, and performance reviews.

Industry-Standard Tools

The Exact Tools Used by Professional Developers

Knowing the right tools is as important as knowing the right code. This program ensures you graduate with hands-on experience in the tools that appear in every modern Java developer job description.

IntelliJ IDEA

Primary Java IDE

VS Code

Frontend development

Eclipse

Java development alternative

Git

Version control system

GitHub

Code hosting & collaboration

MySQL Workbench

Database design & management

Postman

API testing & documentation

Maven

Project build & dependency management

Gradle

Build automation

Apache Tomcat

Java web server

React DevTools

Component debugging

npm / Node.js

Package management

Swagger / OpenAPI

API documentation

JUnit

Unit testing

Mockito

Mocking framework

Roles You'll Be Qualified For

Java Full Stack Developer · Backend Engineer · Frontend Developer

Graduates of this program are equipped to apply for a wide range of high-demand roles across the IT industry. Here are the positions you'll be ready to pursue upon completion.

Java Full Stack Developer

Build end-to-end web applications using Java, Spring Boot, and React JS. The most in-demand role for this skill set.

Backend Java Developer

Design and develop robust server-side applications, REST APIs, and microservices using Spring Boot.

Frontend Developer (React)

Create dynamic, responsive user interfaces using React JS, Tailwind CSS, and modern JavaScript.

Database Developer / DBA

Design, optimize, and manage relational databases using MySQL and JPA/Hibernate.

API Developer

Specialize in designing, building, and documenting RESTful APIs consumed by web and mobile applications.

Software Engineer (Fresher)

Enter the industry as a well-rounded software engineer ready to contribute from Day 1.

Average Salary Range

₹3.5–6 LPA

Entry Level (0–1 year)

₹6–12 LPA

Mid Level (2–4 years)

₹12–25 LPA

Senior Level (5+ years)

We Don't Just Train You — We Place You

Interview Prep • Resume Building • Placement Support

Technical skills alone won't land you the job. Our dedicated career preparation module ensures you walk into every interview with confidence, a polished profile, and a strategy that works.

Interview Preparation

- 200+ curated Java Full Stack interview questions
- Topic-wise mock interviews (Java, Spring Boot, React, SQL)
- System design basics for fresher interviews
- Data Structures & Algorithms (DSA) essentials in Java
- Live coding practice sessions
- Behavioral interview coaching (STAR method)
- Company-specific preparation (TCS, Infosys, Wipro, startups)

Career Support

- Professional resume building with ATS optimization
- LinkedIn profile setup and optimization
- GitHub portfolio review and cleanup
- Job application strategy and job board guidance
- Referral network access through alumni and mentors
- Soft skills: communication, email etiquette, professional presence
- Post-placement mentorship for first 3 months
